Collection REFINED STRUCTURES 3

Description

The Refined Structures 3 collection draws inspiration from the vast universe of Armani/Casa styles. The vinyl support – the leitmotif of the collection, as with the previous Refined Structures – is skillfully used to recreate, thanks to specially designed production techniques, three-dimensional textures and material effects ranging from fashion to nature. The typical irregularities of silk shantung and the characteristic design of moiré finishes are reminiscent of the world of precious yarns and fabrics; vegetal elements, such as bamboo and ginkgo leaves, pay homage to the charm of the Far East; trompe-l'oeil and boiserie effects recall the aesthetics of wall coverings of the past, reinterpreted in a contemporary key; weave designs celebrate the craftsmanship and manual work of tradition.
